

SATURN SEXTILE NATAL MOON

Saturn sextile natal moon can be quite challenging. However, because the energies of the Sextile aspect have to do with opportunities through engagement, there is a constructive energy that applies to this aspect.

Saturn is the teacher, the disciplinarian. Through hard work and a steady approach, Saturn's energies can initiate achievement. With the right amount of effort, especially when we are talking about the Sextile, Saturn can initiate the potential for long lasting gain especially through the feeling nature due to its influence in this case with the Moon.

Sometimes this will relate to the mother or important female individuals.

Eventually after the sextile, Saturn will make a Square aspect to the Natal Moon, so what we do with the Sextile aspect will undoubtedly assist over time when the Square aspect comes into play. The emotions will most likely be involved throughout this whole interchange, and Saturn makes emotional responses difficult even under the best of conditions.

Perhaps this relates to the home where the mother currently resides. There is often a steady and reliable situation when we speak of the home environment. Perhaps the mother, who might be beginning to show signs of aging, will need to be placed in a home soon. This can be a touchy situation because perhaps she feels like she does not need assisted living, but part of you knows that this is fast approaching. The emotions come to the surface for both of you, but you know that something needs to happen soon, so you try to explain the situation to her.

This might be a good time to start to organize the placement, as it will likely take some time before things fall into place (Saturn's influence). You might want to take this opportunity (Sextile aspect) to get things moving in the right direction. If there are challenging conditions coming into focus, (perhaps this aspect also forms a difficult aspect to Mercury) then perhaps her mind or your decision making is strongly affected by the emotional situation at hand. You may have to make challenging decisions, and this can be even more challenging if Uranus or Pluto also connected by aspect.

For example, Uranus involved in the situation could bring things to a head when you least expect it, and Pluto could suggest that this will be life changing for your mother and likely for you as well.

Much can be ascertained by the story written within the natal chart as well as other transits or progressions in place during the affected time of this aspect.

Sextiles suggests that opportunities are in place, but that does not mean that it will be an easy journey. The house position and Saturn's natal position by house and aspect will further define what takes place as time progresses and the energies begins to come to the surface.
