

## **NEPTUNE SEXTILE NATAL JUPITER**

Neptune is connected to the spiritual realm.

Neptune will maneuver its way into the sign of Aries in March, 2025 but goes into retrograde and will not fully intergrate into Aries until January, 2026. As at 2026, Neptune will remain in Aries until March 2039.

We generally do not use signs when describing aspects but due to this long-lived Aries visit, we will use the influence of Aries in this article for more detailed information.

With Neptune Sextile natal Jupiter there will be a real push to find solace in Spirituality and the mystical side of life. This will now be on a personal basis as Aries is connected to self and the need to move within self-serving enterprises.

Neptune in Pisces, its natural placement, would have opened the door for many who wished to delve deeper into their mystical side. Now is the time to put all of that training and education into practice. Much will depend on the placement of transiting Neptune in your natal chart as this will be the area of life that is exposed to these energies. Also, look at the natal placement of Neptune as well as the aspects it receives in the natal chart as this will provide further important information.

Natal Jupiter and its house placement will speak in terms of expansion and potential growth. Jupiter often brings with it good fortune, easy flow in obtaining your objectives, and in general, positive energy.

Neptune and Jupiter in sextile to one another, allowing a 3-5° orb of influence, can create opportunities for growth and expansion around spirituality, music, and theatre, especially if the fifth house is part of the process and the psychic realm for those that have an interest in these fields of expression. I personally use a smaller orb because, although we can feel these energies coming into our lives, the energies become stronger the closer they are to being direct.

Sextiles are opportunity aspects, but in many cases, we will have to work to put these opportunities now entering our lives into action, as without our involvement not much may take hold. Once again, look to the houses where transiting Neptune is in, the houses where natal Jupiter and natal

Neptune are in and the other aspects taking hold to get a full, clear picture of these energies in place now.

Neptune sextile natal Jupiter provides a great opportunity for growth if you put in the effort required. Don't waste this energy.
